

## Subcontractor Management in Project-CRM

In the construction industry, effective project, and customer relationship management (CRM) tools are invaluable. KMS, a specialist in construction CRM solutions, offers KMS Project-CRM, a versatile solution designed to streamline various aspects of construction operations. Among its many features, KMS Project-CRM simplifies subcontractor management, eliminating the need for cumbersome spreadsheets. In this article, we'll explore how KMS Project-CRM can assist in optimising the subcontractor management processes.

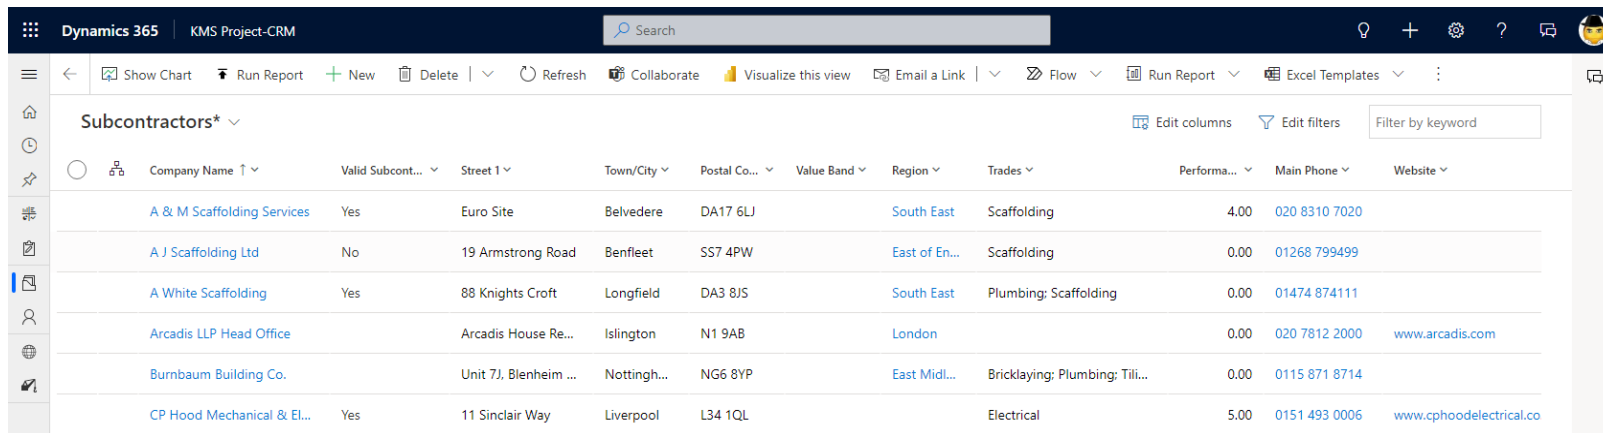

### Data Capture: The Foundation of Subcontractor Management

Managing subcontractors effectively hinges on comprehensive data capture. KMS Project-CRM excels in this regard by offering two primary areas of data capture:

1. Subcontractor Company/Contacts:

In your CRM database, subcontractors are treated just like any other company but come with a wealth of additional details. These details encompass crucial information such as insurance coverage, trade expertise, and performance ratings. This feature ensures that you have a holistic view of your subcontractors, enabling informed decision-making.

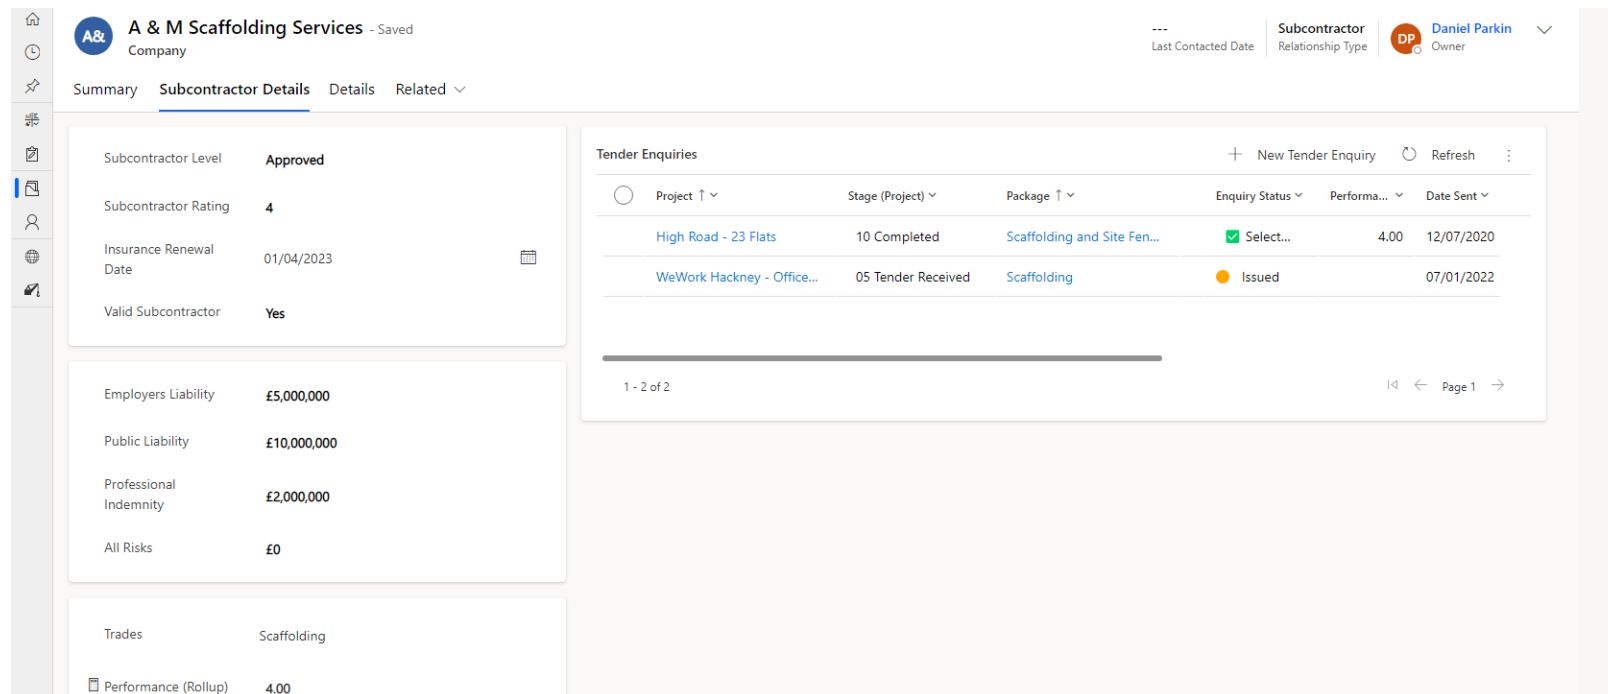

#### Subcontractor Views in Project-CRM:

The screenshot shows the Dynamics 365 Project-CRM interface for the 'Subcontractors' view. The table displays the following data:

Company Name	Valid Subcont...	Street 1	Town/City	Postal Co...	Value Band	Region	Trades	Performa...	Main Phone	Website
<a href="#">A &amp; M Scaffolding Services</a>	Yes	Euro Site	Belvedere	DA17 6LJ		South East	Scaffolding	4.00	020 8310 7020	
<a href="#">A J Scaffolding Ltd</a>	No	19 Armstrong Road	Benfleet	SS7 4PW		East of En...	Scaffolding	0.00	01268 799499	
<a href="#">A White Scaffolding</a>	Yes	88 Knights Croft	Longfield	DA3 8JS		South East	Plumbing; Scaffolding	0.00	01474 874111

Let's take a closer look at a sample subcontractor record in Dynamics:

The screenshot shows the Dynamics CRM interface for a subcontractor record. The header includes the company name 'A & M Scaffolding Services - Saved' and the user 'Daniel Parkin' (Owner). The main content is divided into two sections: 'Subcontractor Details' and 'Tender Enquiries'.

**Subcontractor Details:**

- Subcontractor Level: **Approved**
- Subcontractor Rating: **4**
- Insurance Renewal Date: 01/04/2023
- Valid Subcontractor: **Yes**
- Employers Liability: **£5,000,000**
- Public Liability: **£10,000,000**
- Professional Indemnity: **£2,000,000**
- All Risks: **£0**
- Trades: Scaffolding
- Performance (Rollup): **4.00**

**Tender Enquiries:**

Project	Stage (Project)	Package	Enquiry Status	Performa...	Date Sent
High Road - 23 Flats	10 Completed	Scaffolding and Site Fen...	✔ Select...	4.00	12/07/2020
WeWork Hackney - Office...	05 Tender Received	Scaffolding	● Issued		07/01/2022

## 2. Tender Enquiries:

One of the standout features of KMS Project-CRM is its ability to build packages within a project and seamlessly associate them with subcontractors. This not only simplifies the process of tracking tender enquiries but also provides a centralised hub for monitoring and managing subcontractor-related tasks. Packages can be created, and then each package can be assigned to a set of subcontractors:

## Business Uses: Harnessing Subcontractor Data for Success

Once you've harnessed this data, you can leverage it in a myriad of ways to optimise your operations and improve overall project performance. Here are some key applications:

### 1. Insurance and Approval Management:

Use customised views and alerts to ensure that insurance details for subcontractors are consistently up-to-date. With KMS Project-CRM, you can even automate the approval process for new subcontractors after they've successfully undergone your qualification procedures.

### 2. Tender Enquiry Tracking

Say goodbye to the chaos of managing multiple subcontractor quotes across various projects. KMS Project-CRM empowers you to keep a tight grip on tender enquiries and return dates. Whether you prefer a project-specific approach or want to view a comprehensive list of outstanding enquiries, the system has you covered.

### 3. Performance Monitoring:

**Performance Monitoring:** Performance is paramount in the construction and project management realm. By scoring subcontractor performance on each project, KMS Project-CRM allows you to create a valuable profile of your best-performing subcontractors. This not only rewards excellence but also helps you identify areas for improvement.

With KMS Project-CRM's subcontractor management capabilities, project-centric businesses can bid farewell to the days of spreadsheet chaos and embrace a streamlined, data-driven approach to managing subcontractors. By centralising data capture and offering a plethora of practical applications, this CRM solution empowers organisations to optimize their operations and deliver exceptional results on every project.
